

TBJ Model 36-96-AH PPT Instrument Prep & Pack Workstation

Product Specification

Product Description

The TBJ Model 36-96-AH PPT Instrument Prep and Pack Workstation is designed for use in sterile processing departments for assembling instrument sets while also providing an organized work area. The workstation includes electric push-button height adjustment with adjustment from 32" to 40" high. It includes (2) 20" wide storage drawers and our unique ergonomic access "cut out". All TBJ prep and pack stations are constructed of type 304 stainless steel.

Dimensions

The 36-96-AH PPT is 36 Wide x 96" Long. The height adjustment feature allows the work top to be adjustable between 32" and 40" High (other travel ranges are available).

Construction/Design

- Heavy duty stainless steel construction.
- Type 304 stainless steel counter top, 16 gauge, #4 finish.
- Counter top reinforced underneath for added strength
- Type 304 stainless steel tubular legs, 1 ½" square x 16 gauge wall.
- Seamless heliarc welded construction
- All exposed welds ground and polished.
- Adjustable leveling feet or OPTIONAL swivel casters.
- Standard design includes electric height adjustment system. Manual height adjustment or fixed height is optional
- A wide variety of optional features are available to add to the base unit. See optional features listed below.
