

TBJ Model 36-72

Multi-Purpose Tub/Table (ref. dwg. R00005)

Description:

The TBJ Model 36-72 Multi-Purpose Tub/Table is designed to provide a workstation for a variety of procedures including surgery prep, necropsy, hydrotherapy and grooming.

Standard Design and Construction:

The table shall have overall dimensions of 36 wide x 72 long x 36 high.

The table shall utilize Type 304 14 and 16 gauge stainless steel construction.

All welds shall be heliarc. All exposed welds shall be ground and polished.

The table shall utilize 1 1/2 square x 16 gauge wall stainless steel tubular legs with bullet type adjustable leveling feet.

The table shall be provided with a 64 long heavy duty, removable stainless steel round-bar grill to enable water, fluids and solutions to fall to the tub below for drainage.

The tub depth shall be 16 deep and the bottom shall be sloped to a 2 I.P.S. drain connection.

The table can be provided with an OPTIONAL chrome plated, single lever, hot and cold water faucet with spray gun with retractable hose.

The table can be provided with an OPTIONAL removable, solid stainless steel top to provide a solid work surface.

The table can be provided with an OPTIONAL deck mounted eyewash.
